2018 - 2019 Update: Application Compliance

In the 2017-2018 cycle, more than 8% of CDP applications (all subcategories) submitted were triaged without full review based on non-compliance with the [Mission Score](#) and [Blood Cancer Relevance](#).

In recent years, approximately 10-15% of all applications had serious administrative/structural flaws. These include non-adherence to page numbers, font size, or missing sections (e.g. a Sponsor Letter or Biosketch). Applications with such flaws run the risk of administrative triage.

Carefully check the final version prior to upload (even if someone else uploads for you).

About The Leukemia & Lymphoma Society, Inc.

The Leukemia & Lymphoma Society, Inc. (LLS) is a national voluntary health agency dedicated to the conquest of hematologic malignancies and relevant premalignant conditions. LLS supports research, patient aid, community service programs, advocacy, and public and professional education.

Description of CDP Scholar Award

Through the Career Development Program, LLS supports talented blood cancer researchers in the early phase of their careers. CDP continues to provide a pool of dedicated researchers to advance the understanding and diagnosis of cancer, as well as the development of treatment and prevention options that will ultimately lead to cures for blood cancer patients. Scholar applicants are primarily basic and translational researchers; those who are primarily clinical researchers should apply in the Scholar in Clinical Research subcategory.

The **Scholar** Award is for 5 years. The maximum award per year is \$110,000 and includes the applicant's salary and fringe benefits. A Scholar's salary may be supplemented by funds from another source. Indirect costs may be included and cannot exceed 5% of the total direct costs requested in the proposal. The final value of the Award may be limited by the Applicant's Sponsoring Institution's salary range. Expenditures for laboratory costs/equipment, travel, etc. are not permitted. ***The awarded value will be limited to the amount requested in the submitted proposal.*** It is anticipated that the proposed research will occupy a majority of the applicant's time. However, there are no requirements for a certain percent effort. Scholar applicants are Assistant or Associate Professors; those with different titles must provide a description of their position to researchprograms@lls.org. Scholar applicants **must** hold an independent position. This Award is not intended for well-established and/or senior investigators.

Eligibility

Scholar applicants must...

- have a Sponsor who will attest to institutional support for the applicant. An appropriate Sponsor may be a department head, chief of service, or program chair. The Sponsor must be from the same institution and in a position of direct relevance to the applicant.
- be an independent investigator of at least an Assistant Professor position or equivalent (see [Experience/eligibility clock](#)).
- have adequate funding to support the proposed research (see [Research Support Requirement](#)).
- not have, nor have had, other career development support that has a higher total award amount than a Scholar Award.
- have started their *first* independent position within 8 years of the time of review (see [Experience/eligibility clock](#)).

Citizenship

LLS welcomes applications from both US citizens and non-US citizens, as well as applicants who are performing research outside the United States.

Degree

Applicants must hold a PhD, MD, DVM, or equivalent degree.

Experience/eligibility clock

Applicants must have held an independent, faculty-level, tenure-track position (or equivalent) for less than or equal to 8 years at the time of review (January 1, 2019). All such positions are counted for the 8 year total. Instructor-level positions are not counted as independent for eligibility purposes. In some cases, LLS may ask for a letter from any applicable institution confirming employment start date(s). Research Assistant Professor (and similar/equivalent positions) may or may not count towards eligibility depending on the policy of the institution where that position was held. ***An explanation of these position types must be provided by the full application due date, or the full application may be administratively triaged.*** In cases where the position would not be considered independent, a letter from the institution will be required explaining their policy, but only in cases where such positions might put the applicant outside the eligibility range.

Institution Affiliation

Applicants must be affiliated with a non-profit Sponsoring Institution at the time funding commences and for the duration of the award.

Research Support Requirement

Scholar Awards support only salary. Applicants must have active grant(s) (peer-reviewed, national-level; R01-equivalent) to support the research proposed in their application (or related research). This funding must not be a transitional award. The presence of funding will be

assessed at the eligibility phase, while the details of the blood cancer relevance of that funding will be assessed after full application submission. In cases where funding starts after the eligibility due date, the applicant must send evidence from the funding agency of the award details (including funding agency, type, award amount, and start date; send to researchprograms@lls.org).

Research support that ends prior to the Award start date may not be used as evidence of adequate support.

Application Limitations

Applicants may only submit one application. There is no limit to the number of applications submitted from a specific institution, nor is there a limit to the number of Scholar applications on which a Sponsor is listed.

Transfers

The application must be designed from the standpoint of where the research will be performed. If a transfer is being considered, notify The Leukemia & Lymphoma Society as soon as possible. Since applicants are judged in part on their institutional environment, a change to a new institution may affect the review process. If a transfer is agreed upon by the applicant and a new institution after the in person review panel meeting (or if The Leukemia & Lymphoma Society is notified of such a transfer after the in person review panel meeting), the award may be re-reviewed by both The Leukemia & Lymphoma Society staff and select members of the review panel. If LLS staff and the review panel members agree that this move is beneficial, funding will be awarded. However, there may be cases where the award may not be funded.

Blood Cancer Relevance

General

Scholar Awards are intended for early career scientists with an established track record in research directly relevant to blood cancer. Relevance is determined by the experimental approach. Correlation of a biological phenomenon with blood cancer is not sufficient evidence of relevance to LLS's Mission. This should be demonstrated by appropriate publications (see [Key Publications](#)) and research funding (including current research support; see [Research Support Requirement](#)). The proposed experiments must seek to answer questions about blood cancer or normal blood cell function of clear relevance to blood cancer.

To be eligible for a Scholar Award, the applicant must have blood cancer research experience, as evidenced by a substantial publication record in a field directly relevant to blood cancer.

Scholar applicants who do not have an established record of publications and funding demonstrating a commitment to blood cancer research will be triaged without full review.

In the most recent CDP application cycle, multiple Scholar applicants were eliminated prior to full review for lack of direct blood cancer relevance to their proposed research and/or lack of appropriate blood cancer research experience.

Post-Award Adherence to Aims

CDP Awards are selected in part based on the aims in the application. LLS requires any substantial change to aims of funded Awards to be approved in order to continue receiving funding. LLS understands that science does not progress in a direct path, and thus minor changes to the aims need not be approved by LLS (but should be described in annual progress reports).

Changes to the aims that substantially reduce the impact of the research on LLS's Mission will not be approved and funding may be reduced or eliminated.

Review Process & Applicant Notification

CDP applications are reviewed by an independent, voluntary panel of experts.

Review criteria for **Scholar** applications include:

- Accomplishments of the applicant; recent research accomplishments must have direct relevance to blood cancer or normal blood biology that is clearly relevant to blood cancer.
- Scientific quality of the proposal.
- Access to applicable key materials and models, including patient materials, animal models, drugs, etc., to demonstrate feasibility of proposed experiments.
- Clarity of presentation.
- Direct relevance of proposed research to blood cancer.
- Likelihood of the applicant becoming a leader in the blood cancer field.
- The institution's support for the applicant's research program and career advancement, as demonstrated in the Sponsor Letter.

Based on these criteria, the applicant receives a priority score based on the NIH scoring system.

Early-stage Assistant Professors who have not established independence from their postdoctoral lab will likely be less competitive (i.e. applicants lacking sufficient corresponding author publications without the postdoctoral advisor as an author).

The applicant also receives a **Mission Score** to measure adherence of the application to LLS's Mission of curing blood cancer. CDP Awards must focus on those questions of direct relevance to blood cancer, which may include questions of normal blood biology. Research on normal blood biology must have a clear relevance to blood cancer.

Proposals that do not have clear relevance to blood cancer will be triaged without full review.

Mission Score of 1: The experimental plan must address mechanisms directly relevant to the pathogenesis, diagnosis, or treatment of hematologic malignancies and/or relevant premalignant conditions/states. In addition, at least some experiments must include patients, patient materials, or the most appropriate animal model system.

Mission Score of 2: The experimental plan must address mechanisms directly relevant to the pathogenesis, diagnosis, or treatment of hematologic malignancies and/or relevant premalignant conditions/states. In addition, at least some experiments must use cell lines and/or animal models that are directly relevant to hematologic malignancies and/or relevant premalignant conditions/states.

Mission Score of 3: The experimental plan must address basic mechanisms directly relevant to normal blood cell development, hematopoietic stem/precursor cell function, or immune responses. These studies must have clear relevance to blood cancer and must use appropriate models to understand these mechanisms in blood cells.

Mission Score of 4: Does not address mechanisms directly relevant to normal blood cell development/function, hematologic malignancies and/or relevant premalignant conditions/states.

Applications with a Mission Score of 4 will be triaged.

After the review panel meeting, Mission-relevant applications (Mission Scores 1, 2 and 3) will be rank-ordered based on their Priority Score and those within or near the payline will be presented to LLS's oversight committees for approval. Applicants will be notified of the final decision on their application by late February. All Priority Scores are confidential and are available only to LLS oversight committees and staff. Brief, anonymous feedback from the review panel may be provided, but only when available.

Applicants can see the status of their application on the LLS Research Portal. Up until final decisions are made, the status will be "Under Review." After final decisions are made, the status will either be "Awarded," "Waitlist" or "Not Funded." The final status change will be made by late February. Please do not call or email regarding status updates. Notification by email will also happen by late February.

Key Dates

Phase	Date
Eligibility Phase: open	May 2018
Eligibility Phase: close	September 1, 2018, 3:00 PM ET
Eligibility determination by LLS staff	Rolling: May through September 8, 2018
Notification of eligibility	By September 8, 2018 (typically within 2 business days after submission)
Abstract Phase: open	After eligibility is approved
Abstract Phase: close	September 15, 2018, 3:00 PM (ET)
Full Application Phase: open	After Abstract Phase submission
Reference letters due	October 3, 2018, 3:00 PM (ET)
Full Application Phase: close	October 3, 2018, 3:00PM (ET)
Panel Review Meeting	January 2019
Award Notification	February 2019
Final version of Lay Abstract due	May 1, 2019
Award Start Date*	July 1, 2019

*LLS's non-negotiable Grant Agreement Terms & Conditions are available on www.lls.org.

The submission deadlines will be enforced. Please note that all times are Eastern Time (ET). If any date falls on a weekend or US holiday, the deadline becomes the next business day.

It is highly recommended that submissions are done the day prior to the deadline. Internet traffic may be slow near the deadline, which may result in difficulties in submission. In addition, LLS's response time to questions may be delayed by the high volume received near the deadline. Therefore, it is imperative that any questions be posed to LLS as far ahead as possible. The LLS

Research Portal automatically shuts down submissions after the deadline has passed. Late submissions due to technical difficulties will not be accepted. Every year, a few applicants get caught with difficulty near the deadline; some are unable to submit because of these issues. The best way to avoid this problem is to submit every section well ahead of the deadline.

General Application Instructions

The CDP application will be completed in 3 phases: Eligibility, Abstract, and Full Application. Below are step-by-step instructions for applying:

1. Read the Guidelines & Instructions (this document) in full.
2. Log in to the [LLS Research Portal \(lls.fluxx.io\)](https://lls.fluxx.io) and select Career Development Program. Click "Apply to CDP!" to begin the application process (well ahead of the deadline).
 - o If you need a new account or need to reset your password for an existing account, contact researchprograms@lls.org.
3. Familiarize yourself with the LLS Research Portal.
4. Follow the instructions on the LLS Research Portal and this document to complete and submit your Eligibility.
5. You will receive an email notifying you of your Eligibility approval status. Once your Eligibility is approved, return to the LLS Research Portal, select "New or Pending" under *Requests* on the left panel and follow the instructions on the site and in this document to submit your Abstract.
 - o You may be contacted by an LLS staff member if the information provided on your eligibility request suggests that you may be better suited for a different award category.
 - o LLS staff will determine eligibility on a rolling basis using the criteria described in this document.
6. Once you have submitted your Abstract components, you may immediately begin your Full Application. Please carefully follow the instructions on the LLS Research Portal and this document. Full Applications require completion of both the web form and the current application template, which should be downloaded from the *Project Document* section of the LLS Research Portal. **Failure to follow all application instructions may result in administrative triage of your application.**
 - o Contact researchprograms@lls.org with any questions about the application that are not addressed in the LLS Research Portal or this document.
7. Request letters of reference well in advance of the Full Application deadline. This deadline also applies to reference letters, which are part of your Full Application.
8. Submit your Full Application to LLS prior to the Full Application deadline. **We strongly recommend submitting at least 1 week in advance of the deadline, as site traffic on the day of and days leading up to the deadline will be heavy.**

Carefully check every page of your application prior to submission. You are ultimately responsible for this submission, even if someone else submits your final application.

At any time during the application process, including after submitting your Full Application, you can check the status of your application by logging in to the LLS Research Portal, selecting your

application (under *Requests* in either “New or Pending” or “Submitted”) and referring to the Status in the yellow box at the top of the page.

If you have any technical difficulties with the [LLS Research Portal](#), please contact researchprograms@lls.org.

Detailed Eligibility Phase Instructions

Only organizational details and general eligibility information are entered at this phase. Applicants may submit eligibility immediately after the program opens. Eligibility will be evaluated by LLS staff on a rolling basis (see the [Eligibility Review](#) section below). If eligibility is approved, the applicant may proceed to the next phase of the application. If eligibility is rejected, the applicant may submit two more times if new information is provided and the eligibility deadline has not passed. Follow instructions on the LLS Research Portal to complete the web form.

Submission and Confirmation

After clicking the “Submit” button, you will receive an automated email stating that your information was successfully submitted. **If you do not receive the email confirmation within 2 business days of submission, contact researchprograms@lls.org. It is also recommended that you confirm each stage of the application process by checking your application status on the LLS Research Portal at lls.fluxx.io.**

Eligibility Review

LLS staff will review eligibility on a rolling basis. Refer to [Key Dates](#) for details. **If you have not received notification within this time frame, contact researchprograms@lls.org.**

If eligibility is accepted, you will have access to the Abstract Phase.

During the eligibility phase, the applicant should carefully consider who will write letters of reference on their behalf and alert them of the due date for these letters (See [Letters of Reference](#) subsection in the [Detailed Abstract Phase Instructions](#)). Letters submitted past the deadline will not be accepted. It is therefore beneficial to you to have a backup letter writer in case one of your original writers is not able to submit on time.

Detailed Abstract Phase Instructions

There are two main aspects of the Abstract Phase:

- Letters of Reference
- Project Information

The letter of reference information can be added as soon as the application moves to the Abstract Phase. It is recommended to complete the letters of reference information before starting the Project Information components, so that the writers get their submission instructions early (more

details are found in the next section). Completion of the letters of reference section must happen prior to final submission of all Abstract Phase components.

Note: Lay abstracts are not asked for during the application process. Lay abstracts will be required of those selected for funding following Award notification. ***The lay abstract is essential for LLS to continue successful fundraising to support our current and future grantees.*** Thus, a well-written lay abstract, with sufficient detail, and suitable for the general public is required post-award. After award notification, LLS will contact awardees regarding lay abstract submission.

Letters of Reference

The applicant must have three reference letters submitted on their behalf. These letters must be submitted directly by the letter writers to the LLS Research Portal. (See [Initiating Blind Reference Letters](#) below).

It is the responsibility of the applicant to ensure that the letters are received by LLS by the deadline. Letters submitted past the deadline will not be accepted.

Reference Letter Policies

- Three letters are required.
- No more than four letters will be accepted.
- Two letters must be from outside the Sponsoring Institution.
- Letters are blinded to the applicant and must be uploaded directly by the writer.

The Sponsor Letter is separate from the letters of reference and therefore is not considered one of the three letters of reference; Sponsor information should not be provided in the letters of reference section on LLS Research Portal.

Initiating Blind Reference Letters

The applicant must contact those who will write their references letters well before the deadline.

A section called “Request Blind Reference Letters” is available on the LLS Research Portal during the Abstract Phase. For each letter writer, press the green “+” button on the right side. A pop up window will appear. Copy and paste the first name, last name, and email address of the letter writer into the designated spaces. After adding this information, press “Create Recommendation.” The pop up will disappear and an email will be automatically sent to the letter writer. The email will contain a unique link that allows the writer to directly upload the letter to the LLS Research Portal. This process is repeated for each of the letter writers.

The email containing this link may end up in the letter writer’s spam. Therefore, after the letter writer’s information is added in the LLS Research Portal, **it is critical for the applicant to**

follow up with each writer to be sure they received the email. If they have not received this email within 24 hours, email researchprograms@lls.org, and the link will be re-sent to them.

The letters will not be viewable by the applicant. However, the applicant can view the letter's status on the LLS Research Portal. Prior to the letter being submitted, a note will be visible to the applicant indicating that no letter is uploaded. After the letter is uploaded, this note will change to indicate that the letter has been submitted.

Project Information

Provide the following after completion of the initiation of blind reference letters. All information must accurately reflect the information in the full application. ***Significant divergence between this section and the full application may negatively affect your funding chances.*** Examples of significant divergence might be stating that the specific disease focus is CLL when your actual focus is normal myeloid development, or stating that your model systems include patient samples, but your full application indicates no patient samples (or access to patient samples).

The scientific abstract should accurately reflect the actual research that you are proposing. Though putting your research in a broader context may be important, it is also important to avoid overstating your research beyond what you are actually proposing.

Submission and Confirmation

After clicking the "Submit" button, you will receive an automated email stating that your information was successfully submitted. If you do not receive the email confirmation within 2 business days of submission, contact researchprograms@lls.org.

Immediately after Abstract Phase submission, you will have access to the Full Application Phase and may proceed with the application.

Changes

Information collected in the Abstract Phase will automatically populate fields in the Full Application Phase. If requested prior to the deadline, changes may be made with LLS approval. Email researchprograms@lls.org requesting any change and identify the elements to be changed. No changes may be made after the Abstract Phase deadline has passed. Failure to follow this policy may result in disqualification of the application. Abstract Phase components must accurately reflect the focus of the full application. See the first paragraph in the [Project Information](#) section.

At this stage, the applicant should follow up with those chosen to write letters of reference to remind them of the upcoming deadline for letter submission.

Detailed Full Application Phase Instructions

Some sections of the full application will carry through from the Abstract Phase. Information that carries through must not be modified; changes made to the Abstract Phase components after the Abstract Phase deadline or prior to the deadline without LLS approval, may result in administrative triage of the full application. The remainder of the full application consists of web form components and elements to be uploaded as a single PDF.

All sections in the full application template must use **Times New Roman 12pt. font**, except figure legends, which may use 10pt. font.

Failure to submit as a single PDF in the order below will result in disqualification of the application.

Project Description Template (downloaded from the LLS Research Portal)

The full application has two sections:

Section 1:

The downloadable project template consists of the following required elements:

a. Applicant and Project Information

Copy and paste the title and abstract from the Abstract Phase. Use Times New Roman 12pt. font.

b. Key Publications (2 page maximum)

Describe 3-5 publications that best demonstrate your contributions to the understanding of blood cancer, or normal blood biology having relevance to blood cancer. You must be the first author or corresponding author on these publications. Use the Blood citation format. In addition, indicate who the corresponding author is. Follow each publication information with a description of how that publication has impacted our understanding of blood cancer. See [Blood Cancer Relevance](#). Use Times New Roman 12pt. font.

c. Statement of Direct Blood Cancer Relevance (0.5 page)

Briefly describe how your proposed research is *directly* relevant to blood cancer (which may include normal blood biology that has relevance to blood cancer). Include the titles of each of your aims. The research described here and in the Project Description section must clearly fit within either Mission Score 1, 2 or 3 in order to proceed to full review. A common problem for applicants that do not fit clearly into the criteria set forth in the [Blood Cancer Relevance](#) section is an overstatement of relevance by describing indirect relevance (e.g. studying a pathway in non-blood cancer systems and trying to relate to blood cancer by stating that this pathway is important in blood cancer). Use Times New Roman 12pt. font.

d. Project Description (11 page maximum, including figures)

The following information should be provided in this order:

- Background (~1-1.5 pages)

- Specific Aims (including a brief description of the aims) (~0.5-1 page)
- Previous Work/Preliminary Data from your lab, including figures*
- Experimental Design and Expected Outcomes, including figures*
- Potential Pitfalls and Alternative Approaches
- Resources and Environment; this section must include a description of access to applicable key materials and models, including patient materials, animal models, drugs, etc.**

Use Times New Roman 12pt. font, except figure legends, which may use 10pt. font.

*Figure legends should be formatted with a font size equivalent of 10pt. or above; figures should indicate the data source (e.g. preliminary data from the applicant's lab or a publication).

*****If your lab does not have demonstrated access to materials, access should be confirmed through letters of collaboration/support from the supplier. Lack of clear access to materials will negatively affect the review of your application.***

The figure legends and the Experimental Design and Expected Outcomes section must clearly identify the model system(s) used (e.g. cell line name, what type of cell, etc.).

e. References (5 page maximum)

Use the Blood citation format. Use Times New Roman 12pt. font.

f. Budget

The following information should be provided in the budget template (and on the web form):

- Current salary.
- Fringe benefit expense.
- Cost of living increases should be included in all out years.

The total amount requested must not exceed \$550,000 (\$110,000/year). Should the application be funded, the total amount requested will be the amount awarded, even if the requested total amount is less than \$550,000.

g. Signature Page

This form must be completed, including the indicated signatures.

Section 2:

The following sections must be attached in this order to the end of the template (from Section 1) to create a single PDF. No other information may be provided in this section.

a. Applicant's Biosketch

Use the most recent NIH format. Publications submitted and under review may be indicated on the biosketch. An eRA Commons User Name is not required. The Other Support section must contain all current and pending support from any source. The section of the Biosketch

containing the Research Support section may be used, but all current and pending support must be included; completed support should not be included. As per the NIH format, the goals of each grant must be stated. In addition, specific aims must be listed for current and pending grants that may overlap or appear to overlap with the LLS application. This includes any grants or portions of grants submitted to any organization, including LLS. Since CDP awards primarily fund salary, it is anticipated that there will be overlap between the aims of currently funded grants and the aims of the CDP application.

If funding decisions about potentially overlapping grants become available following submission of an LLS application, LLS must be notified within five business days of the applicant's receipt of that information.

LLS will consider an applicant's other current grant support in its funding decisions. This may result in LLS funding only part of the grant or none of the grant, depending on the level of overlap. In addition, LLS reserves the right to adjust the level of funding of an awarded grant should another overlapping or potentially overlapping grant that was pending at the time of grant submission be awarded to the applicant.

b. Sponsor Letter

The Sponsor Letter must contain the following:

- Description of the applicant's position.
- Description of the Sponsoring Institution's support for the applicant's research.
- Future plans for the applicant's career development at the Sponsoring Institution.
- Description of how the applicant's time will be divided among research and other responsibilities to the Sponsoring Institution.
- The Sponsor Letter is separate from the letters of reference; Sponsors may not write a letter of reference.

The Sponsor Letter is not blinded to the applicant.

c. Collaboration/Support Letters (Optional)

When there are significant collaborations, letters of support are helpful. This is critical when access to patient samples, animal models, or specialized equipment outside of the applicant's laboratory or department is necessary for the proposed research. If a company asset is required and is not commercially available from scientific supply companies, such as proprietary drugs, a letter from the company supplying this asset should accompany the application. The letters must be signed and on institutional/company letterhead.

d. Clinical Protocol (Required where applicable)

Provide a one page summary of clinical protocols essential to the proposed research. Include approval date and compliance number. Indicate if IRB approval is pending.

e. Assurances (Required)

Human Subjects

Indicate if human subjects will be involved in the proposed research. The status (approved, pending or exempt) of IRB (or equivalent institutional designation) approval must be provided. Documentation of any current or pending approvals must be contained in the full application. There is also a section on the web form that must be completed. An application may be submitted with IRB approval pending, but IRB approval must be obtained and provided to LLS prior to the Award start date.

Laboratory Animals

Indicate if animals will be involved in the proposed research. The status and date of the Institutional Animal Care and Use Committee (IACUC) (or equivalent institutional designation) approval must be provided. The Animal Welfare Assurance number must be included. Documentation of any current or pending approvals must be provided in the full application template. There is also a section on the web form that must be completed. An application may be submitted with approval pending, but approval must be obtained and provided to LLS prior to the Award start date.

Recombinant DNA

Indicate if the proposed research involves recombinant DNA. Documentation of any current or pending approvals must be contained in the full application template; there is also a section on the web form that must be completed.

Biohazard Statement

Indicate if the proposed research involves the use of biohazards. Documentation of any current or pending approvals must be contained in the full application template. There is also a section on the web form that must be completed.

f. Publications (Optional)

Up to three manuscripts that are not yet available on PubMed may be provided.

Uploading the project document and final submission

Upload the full application components, as a single PDF, in the “Project Document” section on the LLS Research Portal.

All documents must be combined into a single PDF in the order listed above before uploading. Failure to submit as a single PDF in the order above will result in disqualification of the application.

Submission and Confirmation

After clicking the “Submit” button, you will receive an automated email stating that your information was successfully submitted. **If you do not receive the email confirmation within 2 business days of submission, contact researchprograms@lls.org.**

If extra documents remain after submission and before the deadline, email researchprograms@lls.org and let us know which documents to remove.

Carefully check your PDF prior to submission. If you notice problems with your PDF after you have submitted, email researchprograms@lls.org and we will help you upload the correct document if you are unable to delete the incorrect document. ***This email must be received, with the correct document, prior to the deadline.***

Check the application prior to final submission. The applicant is ultimately responsible for the submission, regardless of who actually is uploading information on the LLS Research Portal. Every year, LLS has a small number of people that notice problems with their application after the deadline. The solution to this problem is very simple and in the hands of the applicant:

- **Check your application prior to final submission.**
- **Submit well ahead of the deadline.**

Once the deadline has passed, only the following updates may be made:

- Significant updates to clinical trials:
 - IRB updates.
 - Opening of the trial.
 - Patient enrollment.
 - Opening of new clinical sites.
 - Efficacy and/or safety updates.
- Manuscripts that have been accepted for publication; the following must be provided:
 - List of authors.
 - Title.
 - Journal.
 - A copy of the acceptance letter from the journal.
- Updates regarding any transfers to a new institution (see Transfers section in Eligibility).

Tips for Applying

- All submissions must be sent through the LLS Research Portal at <https://lls.fluxx.io/>.
 - It is highly recommended to access the LLS Research Portal to begin the application process well in advance of any deadlines.
- Carefully follow all instructions on the web forms, templates and this document, including character limitations and font restrictions.
- Text must be written single spaced in Times New Roman 12pt. font. Character limitations include spaces. Character and other length limitations are strictly enforced on the web form

and the uploaded project description template. Use the pre-set template margins. If character limits are not adhered to, or the preset margins are altered, the application may not be reviewed.

- Bold font indicates required information.
- The application process is completed on a rolling basis; once submission is approved, the applicant may move to the next phase.
- Letters of reference submission status is viewable by the applicant on the LLS Research Portal; the letters themselves are not viewable by the applicant.
- You may save your work and return to it at any time by clicking “Save.” Clicking “Submit” will lock your application and prevent further modification at that stage. Contact researchprograms@lls.org if you submit in error (must be before the deadline).
- Combine all documents into one PDF for the Full Application submission. Only one PDF file is accepted in this section, so delete any other documents uploaded during the process.
- All components of the application must be present in the order indicated in these guidelines.
- All sections should be complete, including:
 - The [Key Publications](#) section of the application template which identifies and describes the applicant’s *first and/or corresponding* author publications
 - The [Blood Cancer Relevance](#) section explaining the *direct* relevance of the research with LLS’s Mission
- Applications must also include:
 - Applicant biosketch attached to the full application template
 - A signed Sponsor Letter attached to the full application template
 - At least three letters of reference, but no more than four; letters must be received by LLS by the full application due date (the Sponsor Letter is separate from the letters of reference)
 - A Clinical Protocol (where applicable)
 - Applicable assurances (human subjects, laboratory animals, etc.)
- Up to three publications, not available on PubMed by the full application due date, may be attached to the application template.
- Completion of several steps in the process initiates emails sent from LLS’s Research Portal, including emails sent to those who will write letters of reference. LLS staff may also send emails during the application process. Spam filters should be monitored for these emails.
 - Contact researchprograms@lls.org if expected emails are not received by the times indicated in these guidelines.
- **It is recommended that final submissions at each stage be completed at least the day prior to the deadline.** Acceptable post-deadline additions are regulatory updates, significant updates to clinical trials and manuscripts accepted for publication (see [Submission and Confirmation](#)).
- **Check your application package carefully prior to submission.** The deadlines stated in the [Key Dates](#) section are enforced.
