The mission of The Leukemia & Lymphoma Society (LLS) is to cure leukemia, lymphoma, Hodgkin’s disease and myeloma, and improve the quality of life of patients and their families.

We fund **RESEARCH** to advance lifesaving treatments.

We provide patients, survivors, caregivers, families and healthcare professionals with hope, guidance, **EDUCATION** and **SUPPORT**.

We drive **ADVOCACY** for policies that protect patient access to lifesaving treatment.

Approximately every **3 minutes** someone in the U.S. is diagnosed with blood cancer.

Nearly **1.4 million** people in the U.S. are living with or in remission from leukemia, lymphoma or myeloma.

About **30 percent** of blood cancer patients still do not survive five years after diagnosis.

About **40 percent** of all pediatric cancers are blood cancers.
LLS MISSION INVESTMENT IS SUPPORTED BY MULTIPLE REVENUE SOURCES

OUR IMPACT

- Invested nearly $1.3 billion in research and development worldwide since founded in 1949
- Helped advance 52 of 60 FDA approved blood cancer drugs
- Supported >93,000 patients since inception
- Responded to 20,000 inquiries in 2019
LLS GLOBAL RESEARCH AND DEVELOPMENT FOCUS
Research and development programs and clinical trials using LLS resources

- **Academic Grants**
  - ~$50 Million/yr over past 20 years at over 80 institutions with >4,000 projects total

- **PedAL**
  - Global precision medicine trial focused on pediatric relapsed leukemia

- **Therapy Acceleration Program®**
  - ~$10 Million/yr venture philanthropy initiative funding >70 portfolio projects since 2007

- **Beat AML® Master Clinical Trial**
  - LLS Sponsored precision medicine trial

**Therapy Acceleration Program®**
LLS THERAPY ACCELERATION PROGRAM (TAP)

Venture philanthropy funding to support novel therapies

Established in 2007

>$125 Million invested to date
  ▪ Biotech: >$90 Million
  ▪ Institutions: ~$35 Million
  ▪ >70 financings of companies and assets
  ▪ >20 assets currently in active development

3 FDA-Approved Therapies
  ▪ Vyxeos (AML)
  ▪ Yescarta (DLBCL, tFL, PMBCL)
  ▪ Elzonris (BPDCN)

ROI Focus:
  ▪ FDA Approvals
  ▪ Assets in clinical development
  ▪ Strategic transactions & financing for portfolio companies
  ▪ Financial ROI to LLS

www.LLS.org/therapy-acceleration-program

BEATING CANCER IS IN OUR BLOOD.

New + Incremental Investments - 2021

*Includes Phase 2 registration-enabling studies
LLS TAP SCIENTIFIC & BUSINESS LEADERSHIP

Lore Gruenbaum, PhD
VP, TAP
- 20 years drug discovery & clinical development
- VP, Gotham Therapeutics; Exec Dir, Applied Biomath
- Biomarker Head, Virology, Roche; Group Leader, BI
- Yale postdoctoral work, principal investigator and collaborator on several SBIR grants

Lee Greenberger, PhD
SVP, Chief Scientific Officer
- 20 years big pharma and biotech
- Oversight responsibility for >$50 M annual research budget
- Advanced > 10 oncology therapeutics into the clinic
- Search & due diligence experience with big pharma

Javeed Froozan, MBA, BS
VP, Business Development
- 25 years biopharma and health technology value creation
- Sr. Dir, Emergent BioSolutions, Multiple start-ups/exits, 2 IPOs
- Business lead on EBS-Trubion M&A transaction. Alliance Manager for Pfizer relationship
- Strategic Investments, M&A, Business Development, Asset Management, and Economic Development

Blaine Robinson, PhD
Executive Director, TAP
- 15 years research & clinical development in blood cancer
- Search & Diligence on 100+ projects
- Scientific lead for over 20 TAP projects including Constellation, Kymera, Ryvu & most recently Abintus, Caribou & Immune-Onc
- Pediatric leukemia researcher, Children’s Hospital of Philadelphia

Jun Xu, PhD
Executive Director – TAP Lead
- 20 years oncology/immunology drug discovery/development
- Search & Diligence on 100+ projects
- Scientific lead for over 20 TAP projects including multiple high impact ones, such as Stemline, Kite, argenX, Forty Seven & most recently Carisma

Therapy Acceleration Program Committee: https://www.lls.org/therapy-acceleration-program/oversight

BEATING CANCER IS IN OUR BLOOD.
**TAP GOALS & INVESTMENT STRATEGY**

Accelerate innovative blood cancer therapies and generate ROI for LLS mission

**Focus on high-value assets:**
- Existing and emerging populations with high unmet needs
- Gaps in current and emerging treatment landscape
- Innovative science, first-in-class assets
- First-in-heme/onc and registration trials
- Strong intellectual property, management, and finances

![Diagram showing average annual number for different stages of TAP process: 80-100 for New Opportunities, 40-50 for LLS Staff Evaluation, 20-30 for Confidential Presentation, 5-10 for External Expert Consultation, and 2-4 for TAP Committee Review.](image-url)
2 PATHS TO CO-INVEST WITH INVESTORS AND VENTURE PHILANTHROPIES

**Strategic**
- Range of Investment: $2 Million to $10 Million
- Presentation to TAP Committee
- Typically, 3-6 months to reach TAP Committee

**Opportunistic**
- Target Investment: $500,000
- LLS TAP team briefs TAP Committee Chair
- Transaction completion in 1-3 months
Key features of LLS TAP Investment Side Letter

- Cites LLS Mission focus and company’s focus and assets in blood cancer
- Investment amount on same terms and conditions as other investors, and use of proceeds (less detail for public companies)
- Exclusion of fees on LLS proceeds to investment banks and other intermediaries (via waiver, decreased total load, or refund to company)
- Information & observer rights (private firms)
- Research Advisory Committee (RAC) structure for recurring meetings between TAP team and company to discuss corporate and program progress – Company retains control of program
- Company participation in LLS events, publication review, and evaluate providing research materials to PI’s.

Side letter captures the mission-driven collaborative nature of the relationship between LLS TAP and the partner companies
TAP VALUE ADD TO BIOTECH COMPANIES

TAP-funded companies benefit from LLS blood cancer insight

- Deep knowledge of indications and rapidly changing SoC
- Unique scientific, clinical, and drug development expertise
- Patient access services to enable understanding of patient needs
- Immediate access to extensive KOL network
- Pharmaceutical, biotech, and research institution partner connections
- Regulatory insight through LLS initiatives (Beat AML Master Clinical Trial®)

TAP record of success provides scientific & investment credibility, and visibility enabling companies to raise additional funds.
TAP PORTFOLIO THERAPEUTIC PLATFORMS FUNDED (2007-2021)

Portfolio is aligned with strong industry focus on Targeted Therapy and reflects growing interest in Cell and IO Therapies in blood cancer

- Targeted Therapy
- Novel IO/antibody
- Cell Therapy
- Epigenetic
- Fusion
- Vaccine
- ADC
- Novel Chemo
- Bispecific
- Protein Degrader
- RNA

71 Projects

>$125 Million
High Unmet Medical Need

- 72,000 newly diagnosed in 8 major markets (2019)
- >10,000 deaths per year in US
- Complex, heterogeneous disease
- Ineffective long-term disease control with current therapies
- Elderly patients not fit for chemo
- Growing use of targeted therapies and combinations

Significant Market Opportunity

- Global AML market $1.4 Billion (2019)
- CAGR 13.6% (projected to 2029)

Table includes assets without a regulatory approval. *GlobalData as of August 31, 2021
1: LLS asset funding (07/2021 M&A by MorphoSys); 2: LLS equity; 3: LLS equity participation plus asset funding (05/2020 M&A by Gilead)
KEY POINTS

LLS TAP has established record of success
- Targeting unmet medical needs
- Leading to FDA approvals of life changing therapeutics
- Creating value for patients, companies and ROI for the LLS mission

LLS would like to expand the reach & impact of the TAP program
- Leverage its unique expertise in novel collaborations
- Attract more companies and investors to blood cancer indications
- Expand TAP capacity to support the most promising assets

TAP
SUCCESS STORIES
TAP SUCCESS: NOVEL LIPOSOMAL CYTOTOXIC THERAPY

Vyxeos® is the first FDA-approved treatment for two types of poor-prognosis AML (2017)

ACQUIRED BY JAZZ PHARMA FOR $1.5 BILLION IN 2016

LLS TAP PROVIDED:

$9.15 MILLION ASSET FUNDING

ROI: $25.3 MILLION

Five-year final results of a phase 3 study of CPX-351 versus 7+3 in older adults with newly diagnosed high-risk/secondary AML

J. Lancet et al., ASCO 2020
TAP SUCCESS: CD19 CHIMERIC ANTIGEN RECEPTOR (CAR) T-CELL THERAPY

Yescarta® is the first FDA-approved CAR-T Therapy in NHL (2017)
LLS has invested > $80 M in Cellular Immunotherapy since 1998

ACQUIRED BY GILEAD FOR $11.9 BILLION IN 2017
LLS TAP PROVIDED:
$2.5 MILLION ASSET FUNDING
ROI: $6.25 MILLION

Long-term safety and activity of axicabtagene ciloleucel in refractory large B-cell lymphoma (ZUMA-1): a single-arm, multicenter, Ph 1-2 trial

Locke et al. 2019. Lancet Oncology
TAP SUCCESS: NOVEL TARGETED CD123 FUSION PROTEIN

Elzonris® is the first approved therapy for rare blood cancer indication BPDCN (2018)

ACQUIRED BY MENARINI GROUP FOR $677 MILLION IN 2020

LLS TAP PROVIDED:

$2.9 MILLION NET ASSET FUNDING

ROI: $7.25 MILLION TO DATE

Treatment outcomes of 29 patients with blastic plasmacytoid dendritic cell neoplasm (BPDCN) who received first-line treatment with tagraxofusp: Probability of overall survival

Pemmaraju et al., 2019. NEM
TAP SUCCESS: MAGROLIMAB (ANTI-CD47 ANTIBODY)

Magrolimab + Azacitidine induces high response rates in MDS and AML

Initiation of registration-enabling studies in 2020

Magrolimab blocks the ‘don’t eat me’ signal on tumor cells

ACQUIRED BY GILEAD FOR $4.9 BILLION IN 2020

LLS TAP PROVIDED:

$4.175 MILLION ASSET FUNDING
$3 MILLION EQUITY INVESTMENT

ROI: >$40 MILLION

---

Magrolimab blocks the ‘don’t eat me’ signal on tumor cells

---

Magrolimab + Azacitidine induces high response rates in MDS and AML

Initiation of registration-enabling studies in 2020

Best Overall Response | 1L MDS | 1L AML
---|---|---
| ORR | 30 (91%) | 16 (64%)
| CR | 14 (42%) | 10 (40%)
| CRi | NA | 4 (16%)
| PR | 1 (3%) | 1 (4%)
| MFS/marrow CR | 8 (24%) | 4 (14%)
| Hematologic improvement (HI) | 7 (21%) | NA
| SD | 3 (9%) | 8 (32%)
| PD | 0 | 1 (4%)

- Magrolimab + AZA induces a 91% ORR (42% CR) in MDS and 64% ORR (56% CR/CRI) in AML
- Responses deepened over time with a 56% 6-month CR rate in MDS patients (assessed in all patients 6 months after initial treatment)
- Median time to response is 1.9 months, more rapid than AZA alone
- Magrolimab + AZA efficacy compares favorably to AZA monotherapy (CR rate 6-17%1,2)

---

BEATING CANCER IS IN OUR BLOOD.
**TAP SUCCESS: KO-539 (MENIN INHIBITOR)**

First-in-class inhibitor of the menin-MLL interaction in Ph1 trial for patients with relapsed/refractory AML

- **Preclinical compounds related to KO-539 licensed to Kura Oncology in 2015**

- **LLS TAP provided:**
  - $6.31 million asset funding to U Michigan
  - ROI: Equity: 26,000+ shares + $26,000+ cash to date

KO-539 Demonstrates Encouraging Early Clinical Activity

Data as of 02 November 2020

- Grants initially and then TAP supported preclinical development (including chemistry) of menin-MLL interaction inhibitors by Jolanta Grembecka at University of Michigan and licensing of assets to Kura Oncology in Dec 2014

- Phase 1/2a trial for R/R AML with MLL fusions/NPM1 mutations
  - First patient dosed in Sept 2019
  - Initiated expansion cohorts in July 2021
TAP SUCCESS: PELABRESIB (BET INHIBITOR)
Pelabrelib + Ruxolitinib induces high spleen volume response rates in JAK-naive myelofibrosis
Initiation of registration-enabling study in 2020

Acquired by Morphosys for $1.7 billion in 2021

LLS TAP provided:
$7.35 million asset funding

ROI: $7.35 million to date

First Novel Mechanism Beyond JAK Inhibitors to Demonstrate POC in 1L MF

- Robust response rate to date in trial of > 60 1L patients
- Strong activity observed as a monotherapy and add on to ruxolitinib 2L+ patients
- Translational data and improvement in anemia supports disease-modifying potential
- Pelabrelib has been generally well-tolerated to date
- Phase 3 trial (MANIFEST-2) under way

1L setting (Am 3)
