COVID-19 VACCINATION SCHEDULE FOR MODERATELY TO SEVERELY IMMUNOCOMPROMISED PATIENTS

Includes blood cancer patients and most survivors*

### Pfizer (mRNA)
- For ages 5 and up
  - Dose 1
  - Wait 21 days
  - Dose 2
  - Wait at least 28 days
  - Dose 3
  - Wait at least 3 months
  - Booster (Dose 4) only for ages 12+

### Moderna (mRNA)
- For ages 18 and up
  - Dose 1
  - Wait 28 days
  - Dose 2
  - Wait at least 28 days
  - Dose 3
  - Wait at least 3 months

### Johnson & Johnson
- For ages 18 and up
  - Dose 1
  - Wait at least 28 days
  - Dose 2
  - Wait at least 2 months
  - Booster (Dose 4*)

*Moderna booster is a half-dose; Pfizer booster is a regular dose.

Note: mRNA COVID-19 vaccines (Pfizer or Moderna) are preferred for those 18 and older.

Any COVID-19 vaccine can be used for the booster dose in people 18 and older, but mRNA vaccines are preferred. For people 12-17 years, only Pfizer vaccine may be used. People 5-11 years should not receive a booster dose at this time.

---

Get vaccinated as recommended even if you had COVID-19

Keep practicing social distancing and masking

*Talk to your healthcare team if unsure of your risk
