Hodgkin Lymphoma

My cancer journey began in 2002 when I was diagnosed with Hodgkin lymphoma. My partner and I were thinking about starting a family and I was considering a new job opportunity when everything stopped. I underwent six months of ABVD chemotherapy and 8 weeks of radiation to my head, neck and chest. During the last week of my radiation treatments, my oncologist called to let me know I was cancer free and no longer needed additional treatments. I was so excited.

I celebrated my new found life! I left my job and founded a non profit organization and three years after completing treatment, I gave birth to my beautiful son. Now, 18 years later, I continue to celebrate every day.
