

LLS Community Guide: Starting a Conversation (aka posting)

- Click on the **Start a conversation** box on the Home page and in that box enter what you would like to say.
- You may add a photo by clicking on **Add A Photo (.JPG or .PNG file types only)**
- You can also write a **Title** in the title field but is not required. Adding a clear title helps with searching for posts within the Community.
- Where it says **Everyone** you can click on the down arrow and can choose from the drop down list whether to post to everyone in the LLS Community or to only a specific group.
- Once your post is ready, click the red **Post** button. Your post will appear in the main feed (or in the group feed if you chose a specific group as your audience) in date/time order, and others community members will be able to comment on your post.

LLS has guidelines regarding the posting of appropriate and acceptable information and material on LLS Community. Please visit https://communityview.lls.org/terms_of_service to review the Terms of Service and guidelines.
